Coated steels

Except where noted, all are available in coils or cut lengths, in a wide range of qualities.

Galvanized Steels

"Premier" Commercial Coating Z180 (G60) to Z700
Premier is a continuous hot dipped galvanized steel sheet most commonly specified as Z275 (G90). The coating is characterized by the "Full Spangle" zinc crystal appearance.
Widths 75 mm (3") to 1525 mm (60")
Thicknesses .30 mm (0.012") to 4.27 mm (0.168")

"Premier" Minimized Spangle Z180 (G60) to Z275 (G90)
This galvanized sheet product features controlled zinc crystal size for less spangle relief; it is intended for painted semi-exposed applications.
Widths 75 mm (3") to 1525 mm (60")
Thicknesses .30 mm (0.012") to 4.27 mm (0.168")

"Dualcoat"
Is a continuous hot dipped galvanized steel sheet, with most of the zinc removed from one side of the sheet. This differentially coated steel typically has a full zinc coating Z275 (G90) on one side and a Z001 (G01) coating on the other side. Other differential coatings such as Z180 (G60) over Z001 (G01) are available.
Widths 75 mm (3") to 1525 mm (60")
Thicknesses .68 mm (0.027") to 3.17 mm (0.125")

"Premier" Non-Wiped Z001 (G01)
The coating consists of a very thin layer of zinc on top of a very thin layer of zinc-iron alloy. The product is normally characterized by a small flat spangle.
Widths 75 mm (3") to 1525 mm (60")
Thicknesses .37 mm (0.015") to 3.17 mm (0.125")

"Satincoat" ZF001 (A01)–(Galvanneal)
This galvanized steel product has a fully alloyed layer and is spangle free with a matte grey appearance. Satincoat is designed primarily for interior painted applications.
Widths 75 mm (3") to 1525 mm (60")
Thicknesses .37 mm (0.015") to 4.27 mm (0.168")

CSP Sheets Z610 min. (2 oz. min.)
This material has 610 grams per square metre (2.0 oz./sq. ft.) zinc coating mass, total both sides.
Widths Culvert widths up to 1525 mm (60")
Thicknesses 1.0 mm (0.040") to 4.27 mm (0.168")

Galvalume Steel

Is an aluminum/zinc alloy coating consisting of approximately 55% aluminum, 43.4% zinc and 1.6% silicon by weight. Galvalume (AZ150) steel delivers at least twice the corrosion resistance of Z275 (G90) galvanized steel. It also delivers heat resistance similar to Type 1 aluminum-coated steel. Galvalume steel is available both prepainted and plain.
Widths Maximum 1220 mm (48")
Thicknesses 0.30 mm (0.012") to 1.63 mm (0.064")

Tin Mill Products

(Widths 508 mm (20") to 965 mm (38")

Electrolytic Tin Plate
Is produced as single reduced, 0.20 mm (0.0079") to 0.38 mm (0.0150") or double reduced, 0.15 mm (0.0059") to 0.28 mm (0.0110") in a complete range of tin coatings in both coils or sheets.

Electrolytic Chromium Coated (TFS-CT)

Tin Mill Black Plate (TMBP)
Is produced as single reduced 0.20 mm (0.0079") to 0.36 mm (0.0142") or double reduced, 0.15 mm (0.0059") to 0.28 mm (0.0110") in both coils or sheets.

Prepainted

"Pre-Coat"
Is a prepainted steel product produced from substrates of Cold Rolled, Galvanized, Galvalume or Tin Mill Products painted in coil form. The coatings are inorganic, organic-based and are applied continuously. Paint coatings include fluorocarbons, plastisols, epoxies, silicon modified (polyesters and acrylics), thermoset acrylics, polyesters, modified polyesters, amine alkyds and solution vinyls.
Widths Maximum 1525 mm (60")
Thicknesses Tin Mill Products 0.22 mm (0.008") to 0.37 mm (0.015")
Cold Rolled 0.37 mm (0.015") to 1.30 mm (0.051")
Galvanized 0.30 mm (0.012") to 1.30 mm (0.051")

INTRODUCTION

Canadian Trade Index has been the authoritative guide to buying and selling in Canada for 89 years. It contains a comprehensive list of Canadian manufacturers having more than a local distribution for their products, irrespective of membership in The Canadian Manufacturers' Association. The Index is kept up-to-date by contact each year with listed companies who are asked to revise or confirm their listings. It is the foremost directory of its kind in Canada today. While great care is taken in compiling the listings, the publishers cannot assume liability for losses arising from any statements, errors or omissions.

HOW TO USE THE CANADIAN TRADE INDEX

There are 8 sections in the Canadian Trade Index:

1. Display Advertisers — pages prefixed A

   Cross references to the display ads follow the companies' listings in Section B.

2. Classified List of Products — pages prefixed B

   When you require a specific product, turn to this section where you will find in alphabetical order some 10,000 classifications of products made in Canada with the names and locations of companies making them. Frequent cross references will help you identify the product listing you want. Supplementing these lists are informative advertisements with additional information about a company's product. Those firms engaged in exporting are indicated by a star preceding their name. For further guidance on the use of this section see page B-2.

3. Geographical Section — pages prefixed C

   If you are on the road and need to know what manufacturers are in the area, turn to this section where head office and plants of listed companies are arranged alphabetically by municipality, by province.

4. Alphabetical List of Manufacturers — pages prefixed D

   If you want to contact a company, look here for head office address, telephone number, branch and sales offices, names and titles of senior operating executives. Other data included — parent and subsidiary companies, principal products, brand names, export contacts, toll free number, fax, telex, annual sales, company size.

5. French Glossary — pages prefixed E

   To assist readers whose first language is not English, an alphabetical list of the product headings in Section B is provided in French followed by the English equivalent.

6. Trade Marks Section — pages prefixed F

   When you know the trade name but not the name of the company manufacturing the product, consult this section. Then refer to Section D for full information about the company.

7. Distributor Section — pages prefixed G

8. Canadian Economic Profile — pages prefixed H

GUIDE TO CLASSIFIED LIST OF PRODUCTS

The alphabetical order of product classifications in the succeeding pages is arranged according to the noun or most important word, which is normally placed first in the heading, *e.g.,* Furniture, office; Hardware, builders'; Leather, boot and shoe upper, etc. This allows the grouping of similar articles. In other cases, where the inversion is unnatural, the headings have been listed as they are commonly known, *e.g.,* Air Appliances; Fire Escapes, etc. Cross references have been supplied where two or more names are used to describe the same article, and in other cases to assist the reader in locating the listing needed.

Street addresses and other details of the firms listed in this section are shown in the alphabetical list of manufacturers — Section D.

A glossary of the product headings in French followed by the English equivalent may be found in Section E.

Firms exporting their products are marked with a star.
